Profile

Full Stack Developer specializing in banking systems, with strong expertise in software architecture design, secure API development, and integration of mission-critical solutions. Holder of a Master's degree in Software Engineering from USTHB, I am proficient in Spring Boot, ASP.NET Core, and Django, with a strong commitment to performance, code quality, and system reliability.

Experience

Full Stack Developer, Trust Bank Algeria 07/2025 – Present
Hydra, Algiers

- Designed an RTGS platform for processing SWIFT MX (ISO 20022) messages supporting interbank payment flows with the Bank of Algeria, using .NET Core.
- Developed an Instant Payment System (IPS) compliant with the ISO 20022 standard, enabling the sending, receiving, and processing of payment messages with the Interbank Clearing Center (CPI) of the Bank of Algeria, using ASP.NET.
- Developed a digital interbank card solution using ASP.NET and Flutter, in collaboration with SATIM.

Stage de fin d'études Master, Hb Technologies SPA 02/2025 – 06/2025
Rouiba, Alger

Smart Loyalty and Digital Payment Platform | Spring Boot, ASO.NET, Flutter

- Integrated a jPOS payment gateway for secure processing of ISO 8583 financial transactions.
- Implemented a Q-Learning-based loyalty system that dynamically adapts rewards according to user behavior.
- Developed a card emulator in C# for NFC transaction simulation.

Stage de fin d'études Licence, SARL DATAGIX 02/2023 – 06/2023
Mohammadia, Alger

Cloud and Telecom Service Management for WHMCS | Django, Bootstrap

- Extended the WHMCS platform to enable customers to manage Cloud and Telecom services from the client portal.
- Integrated a monitoring module for IPBX systems using the 3CX APIs.
